Ngo Minh Khoi

Fresher Front End Developer

Go Vap, Ho Chi Minh City, Viet Nam | ngominhkhoi1108@gmail.com | (+84) 937 525 530

CAREER OBJECTIVE

I recently graduated from Van Lang University with a degree in Information Technology, specializing in Software Engineering. I am seeking a full-time position where I can apply my knowledge, enhance my professional skills, and gain hands-on experience. My goal is to contribute meaningfully to the company while continuously learning and growing in a dynamic, professional environment.

EDUCATION

Van Lang University   **Ho Chi Minh City, Vietnam**

Bachelor of Information Technology in Software Engineering   Sep 2019 - Aug 2024

- **GPA:** 2.72 / 4.00
- **Honors:** Good

T3H Information Technology Institute   **Hanoi, Vietnam**

Front-end Web Development (Online Course)   May 2022 - Aug 2022

- **Honors:** Very Good
- **Knowledge:** HTML5, CSS3, SCSS, Bootstrap 5, JavaScript, Git, Axios, ReactJS, Redux Toolkit.

WORK EXPERIENCE

Alta Media   **Ho Chi Minh City, Vietnam**

Intern - Frontend Developer   Mar 2023 – Jun 2023

- Developed and maintained 2 CMS websites using React.js and TypeScript.
- Translated Figma designs into responsive and interactive UI component.
- Ensured cross-browser and cross-device UI/UX consistency.
- Integrated Firebase APIs and managed app state with Redux Toolkit.

Technologies: React.js, TypeScript, Firebase, Redux Toolkit.

Smart Generation of Digital   **Ho Chi Minh City, Vietnam**

Intern - Frontend Developer   Mar 2024 – Jul 2024

- Developed the frontend of an online quiz system, enabling teachers to manage quizzes and quiz questions, while allowing students to take quizzes.
- Collaborated with backend developers to integrate a shared API, ensuring seamless communication between interfaces.
- Enhanced UI performance and responsiveness.
- Used Git and ClickUp for version control and task management.

Back-end: PHP, SQL, Node.js, Express.js

Databases: MySQL, Firebase, MongoDB, Cloudinary

Project management: Github

SOFT SKILLS

- Adaptability to New Technologies

- Problem Solving Under Pressure

- Proactive & Responsible

- Effective Time Management

- Communication & Teamwork

PROJECTS

Queueing System – Alta Media   May 2023 – June 2023

Description: A web-based queue management system designed to optimize customer service processes at transaction points. The system allows for ticket issuance, real-time queue monitoring, and customer information management.

Team Size: 1

Position: Front-end Developer

Responsibilities:

- Developed the user interface strictly following the company's Figma design.
- Independently set up and integrated Firebase Firestore as the backend for data storage and real-time updates.
- Translated Figma prototypes into responsive and interactive web pages.
- Optimized user experience (UX/UI) and ensured cross-device compatibility.
- Conducted UI testing and fixed interface-related bugs.

Technologies: ReactJS, TypeScript, Boostrap 5, Redux Toolkit, Firestore, Material UI 5.

Link: Demo Github Repository

Cook and Recipes Admin - Github   Jun 2024 – Jan 2025

Description: Developed a web-based admin dashboard for managing cooking recipes, ingredients, categories, users, employees, and chefs. The system provides a modern, intuitive interface for administrators to efficiently perform CRUD operations, monitor statistics, and manage all aspects of recipe data.

Team Size: 2

Role: Front-end Developer

Features:

- Recipe management: add, edit, review, and approve recipes**.**
- Category, ingredient, and chef management.
- User and employee management with detail and update views.
- Role-based access control and group assignment.
- Authentication and authorization for admin access.
- Dashboard with charts and statistics (recipes, users, categories, chefs).
- Responsive, user-friendly interface with notifications and loading indicators.
- Theme switching (Light/Dark mode).

Technologies: React 18, TypeScript, Axios, TanStack Query, Material UI 5, React Hook Form, Yup, Zod, Vercel.

Cook and Recipes Client - Github   Jun 2024 – Jan 2025

Description: A modern web application built with Next.js for discovering and managing cooking recipes. Users can search for recipes, view detailed instructions, save favorites, leave comments and ratings. The app features user authentication, a responsive interface, and SEO optimization through server-side rendering.

Team Size: 2

Role: Front-end Developer

Features:

- Implemented dynamic recipe search and filtering.
- Developed user authentication and profile management.
- Designed responsive UI for seamless experience on all devices.
- Integrated comment and rating system for user interaction.
- Implemented SEO optimization using Next.js features for better search engine performance.

Technologies: Next.js 14, TypeScript, Tailwind CSS, TanStack Query, Shadcn UI, React Hook Form, Zod, Cloudinary, Vercel.
